XXL3

REALFICTION™

THE GRAND XXL3

The new Dreamoc XXL3 is our largest holographic display and the perfect choice for creating those memorable mixed reality experiences in larger settings such as malls, museums and big trade fairs with lots of other parties demanding attention from the audience. With full 4-sided visibility this display gives the viewers a chance to be dazzled by your holographic content from all viewing angles.

CREATE ATTENTION THROUGH SENSORY AWARENESS

All four sides of the Dreamoc XXL3 are fitted with safety laminated 7mm Crystalline™ optics, granting your audience a clear and vivid view of the hologram and whatever item you choose to place inside. The combination of full HD video along with physical items inside the display has a powerful and jaw-dropping effect, and will be sure to engage the viewers and enhance their brand experience.

The XXL3 features built-in speakers and, if needed, it is easily connected to your own external sound system allowing you to crank up the volume or make an impact with directed sound effects. Furthermore, you can choose between 4 exclusive colors at no extra cost, to match specific guidelines, campaign elements or brand environment details.

READY FOR TRAVEL

The Dreamoc XXL3 is made for a life of changing scenes, which is why it comes in sturdy flightcases to keep it safe on the road. It is easily assembled and disassembled for ideal use in many different venues, whether it is to be showing off your brand at competitive trade shows or leaving a grand impression on an audience in a mall.

A LOT OF WOW WITH JUST A LITTLE WORK

The XXL3 is made for continuous use and is very low in maintenance, as it will run up to 30,000 hours before needing any service. In other words, this means a lot of effect with very little effort from you. In every detail this display is built to be incredibly reliable and create maximum impact.

The XXL3 is so large that it can house items of up to three feet across and almost 2 feet in height giving you the opportunity to play around and place bigger or multiple items to be enhanced by the vivid holographic content.

ENGAGE YOUR AUDIENCE

The sheer size is what makes the XXL3 perfect for key installations in museums or other educational institutions, since it allows for highlighting those very special items and make good use of the interactive possibilities. Giving the audience the chance to change and interact with the hologram, will engage your audience and provide lasting impressions. And because it's mixed reality, the options are almost endless – let your audience change the colour of an item, battle other bystanders in a game, or whatever you can come up with that fits into the story you are telling.

HIGHLIGHTED NEW FEATURES

See complete factsheet [here](#)

Completely rebuilt picture engine – New and vastly improved picture engine that comes preassembled and boosts an impressive 4 x 43" Full HD LED screens. This means continuous usage with very low maintenance, built-in speakers and incredibly vivid image quality.
